

- REF: SI017
- NOMBRE: ACTUALIZACIÓN WINDOWS SERVER 2008
- 25 HORAS

Objetivos:

This five-day instructor-led course provides students with the knowledge and skills to work with Network Infrastructure and Active Directory technologies in Windows Server 2008. This course is intended for individuals who already have experience with Network Infrastructure and Active Directory technologies in Windows Server 2000 or Windows Server 2003 to upgrade their skills to Windows Server 2008.

After completing this course, students will be able to:

- *Install and configure Windows Server 2008.*
- *Add and configure Windows Server Core roles.*
- *Explain the new backup infrastructure, including Volume Shadow Copy Service.*
- *Identify new and improved networking features with Windows Server 2008.*
- *Configure Hyper-V virtual machines.*
- *Identify considerations when upgrading from a Windows Server 2003 to a Windows Server 2008 Active Directory infrastructure.*
- *Install and configure Active Directory Federation Services, Active Directory Lightweight Directory Services, and Active Directory Rights Management Services.*
- *Use Read-Only Domain Controllers.*
- *Identify new features in AD DS auditing.*
- *Implement AD DS auditing.*
- *Configure Windows Server 2008 Failover Clustering.*
- *Configure Windows Server 2008 Network Load Balancing.*

Dirigido a:

This course is intended for IT Professionals experienced on the technologies included in Windows Server 2000 or Windows Server 2003, and who hold an MCSE or MCSA certification and/or equivalent knowledge.

Requisitos:

Before attending this course, students must have:

- *Experience planning, implementing, managing, maintaining, and securing Microsoft Windows Server 2000 or 2003, including Active Directory and Network Infrastructure server roles.*
- *Working knowledge of networking, for example, TCP/IP and Domain Name System (DNS).*
- *Experience installing, configuring, and administering Microsoft Windows 2000, Windows XP Professional, or Microsoft Vista.*
- *MCSA on Windows Server 2003 or MCSE on Windows Server 2003 recommended.*

Contenido:

CURSO ACTUALIZACIÓN WINDOWS SERVER 2008

Module 1: Installing and Configuring Windows Server 2008

This module explains how to install and configure Windows Server 2008. It also explores using Server Manager to work with roles, features, PowerShell and other aspects of server configuration like Automatic Updates.

Lessons

- *Server Manager Roles*
- *Windows Server 2008 Features*
- *Active Directory Improvements*

Module 2: Windows Deployment Services

This module explains how to use benefits and components of Windows Deployment Services, including image capture and management.

Lessons

- *Introducing Windows Deployment Services*
- *WDS Components*

Module 3: Windows Server 2008 Server Core

This module explains how to use key functionality and benefits of a Server Core installation, including adding and configuring roles.

Lessons

- **Server Core Introduction**
- **Configuring and Managing Server Core**

Module 4: Windows Backup

This module provides an overview of the new backup infrastructure in Windows Server 2008, including Volume Shadow Copy service, scheduled vs. manual backups, media, the Universal Disk Format (UDF), and restoring data.

Lessons

- **Backup Infrastructure**
- **Optical Media**
- **Restore Utilities**

Module 5: Windows Server 2008 Updates to Networking

This module explains how to use new and improved networking features in Windows Server 2008, including server and domain isolation, IPv6, and DNS.

Lessons

- **Networking with Windows Server 2008**
- **New Networking Features**
- **DNS with Windows Server 2008**
- **Configuring Routing**
- **Configuring Wireless Settings in Server 2008**

Module 6: Network Policies and Access Protection

This module explains how to use Network Access Protection (NAP) and related technologies to enforce security and client health policies.

Lessons

- **Network Policies Access Protection**
- **Enforcement Options**
- **Network Access Protection Scenarios**
- **Routing and Remote Access**

Module 7: Hyper-V

This module explains how to use new capabilities and architecture in Hyper-V, including integrated management functions for physical and virtual environments.

Lessons

- **Introducing Hyper-V**
- **Configuring Hyper-V**

Module 8: Planning for Windows Server 2008 Active Directory Services

This module explains how to install and configure the Active Directory Domain Services (AD DS) server role and administering it with Server Manager. It also explores planning for deploying an Active Directory Domain Services infrastructure.

Lessons

- *Planning for AD DS Deployment*
- *Upgrade Considerations*

Module 9: Active Directory Domain Services

This module explains how to create and manage accounts, subnets, Site-Links, and Group Policy with new features in Active Directory Domain Services.

Lessons

- *What's New in AD DS*
- *Manageability and Reliability*

Module 10: Identity and Access Services in Windows Server 2008 Active Directory

This module introduces Windows Server 2008's new Active Directory Services

Lessons

- *Active Directory Federation Services*
- *Active Directory Lightweight Directory Services*
- *Active Directory Rights Management Services*

Module 11: Read-Only Domain Controllers

This module explains how to set up and manage a read-only domain controller.

Lessons

- *Read-Only Domain Controllers*
- *Read-Only Domain Controller Operation*

Module 12: Auditing Active Directory Domain Services Changes

This module explores new auditing features in Active Directory Domain Services and how to set up and manage auditing events.

Lessons

- *What's New in AD DS Auditing*
- *Implementing AD DS Change Auditing*

Module 13: Enterprise PKI Active Directory Certificate Services (AD CS)

This module explains how to set up and manage Active Directory Certificate Services using PKI View.

Lessons

- **Certificate Authority**

Module 14: High Availability Features

This module explains how to use failover clustering and network load balancing.

Lessons

- **Failover Clustering**
- **Network Load Balancing**

Module 15: Performance Monitoring and Optimization

This module explains how to use Windows Server 2008's performance monitoring tools, including using Windows System Resource Manager to implement server resource controls.

Lessons

- **Windows Reliability and Performance Monitor**
- **Microsoft Windows System Resource Manager**
- **Monitoring Events**

Module 16: Software Maintenance Using Windows Server Update Services

This module introduces Microsoft Windows Server Update Services (WSUS), a tool for managing and distributing software updates that resolve known security vulnerabilities and other stability issues in Microsoft Windows 2000 and newer operating systems, as well as other Microsoft applications. This module also describes how to install the client and server components of WSUS. It also provides necessary information about managing the WSUS infrastructure.

Lessons

- **Introduction to Windows Server Update Services**
- **Installing and Configuring Windows Server Update Services**
- **Managing Windows Server Update Services**
